**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1a. Claims 26 and 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 24-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Amaya et al (US 5,976,457).

Amaya et al disclose the rapid and accurate method of producing molding tools comprising the steps of providing a standard base mold (51), milling the pockets in the mold base, fabricating an interchangeable ceramic insert (50) having mounting surface matching the pockets, and securing the insert to the base pocket. The ceramic insert is produced by ceramic

injection molding (figures 1-8) (col. 9, lines 39-42, lines 54-67, col. 10, lines 1-60). The method allows improved dimensional accuracy and reduction of surface texture inconsistency. The resulting mold includes coordinates reference points or other similar design features. The resulting mold can be used to cast materials such as aluminum or zinc.

***Response to Arguments***

3. Applicant's arguments with respect to claims 15-23 (now have been cancelled) have been considered but are moot in view of the new ground(s) of rejection.
